For more
information,
search:
"Wisconsin
CLPPP info."

For information on how lead
can affect a child's ability to
learn in school, visit the
Wisconsin Department of
Health Services' website.

Look for chipping paint in
your home.

Houses built before
1978 are more likely
than newer houses to
have lead paint hazards
that can poison a child.

A child with lead poisoning
may find it hard to speak,
read, and learn.

Lead poisoning is
most common in
children under age
six.

**Prevent Lead Poisoning
Before it can Damage
your Child's Future
Learning Potential.**
